## Air filter with frame F-R

### Description

G4 air filter with "U" type frame is used in ventilation-air conditioning systems for air filtration. It is recommended for mounting on extraction (return) grilles.

### Technical specifications

#### Characteristics

F-R is composed of G4 filter material and "U" type aluminum frame.

The thickness of the filter material is 20 mm.

#### Materials

The filter material is made of synthetic polyester.

The filtering capacity of the material is 94% and according to EN779 it has G4 filtration class.

The filter frame is made of extruded aluminum profiles with natural finish (unpainted).

## Maintenance

The product does not require maintenance, but periodic checks are recommended to check the degree of clogging.

## Technical drawing

The large dimensions are made of several independent pieces.
