Flexible duct

Uninsulated flexible duct TF-N

Description

Uninsulated flexible duct is used in ventilation and air conditioning systems, without special requirements, for air supply.

Technical specifications

Characteristics

The duct can be easily installed on the round or oval connecting parts.

Uninsulated flexible duct is made in accordance with EN13180 and intended for low and medium pressure ventilation systems.

The temperature range is $-30^{\circ}\text{C} \div +140^{\circ}\text{C}$ and the pressure is up to $+2000\text{ Pa}$.

The maximum operating air velocity is 20 m/s .

The flexible duct has a length of 10 m/piece .

Dimensional range: $\varnothing 102\text{ mm} \div \varnothing 508\text{ mm}$.

Materials

The flexible duct is made of multiple layers of aluminum and polyester with a high-strength carbon steel spiral, closed between the layers.
