

Air through perfection

Circular swirl diffuser

VSR

ACP

Swirl diffusers

Circular swirl diffuser VSR

Description

VSR is a swirl air diffuser with radially adjustable blades.

The diffuser is recommended for installations with constant or variable air flow and is intended for spaces with heights up to 16 m.

It is used for air supply.

Technical specifications

Characteristics

The blades design, their radial arrangement and the swirl action determine a high level of induction rate.

The diffuser is equipped with a perforated plate positioned on the diffuser connection.

VSR is available in 2 configurations:

- VSR - manual operation

The blades position can be modified manually through the long rod ($\varnothing 7$ mm) located on the side of the diffuser's body.

Blades can be fixed in the wanted position by removing the protective cover of the blades system and easy screwing the nut until the blades are blocked. Excessive tightening is not necessary as there is a risk of damaging the adjustment system.

- VSR-T - thermal operation (thermal element).

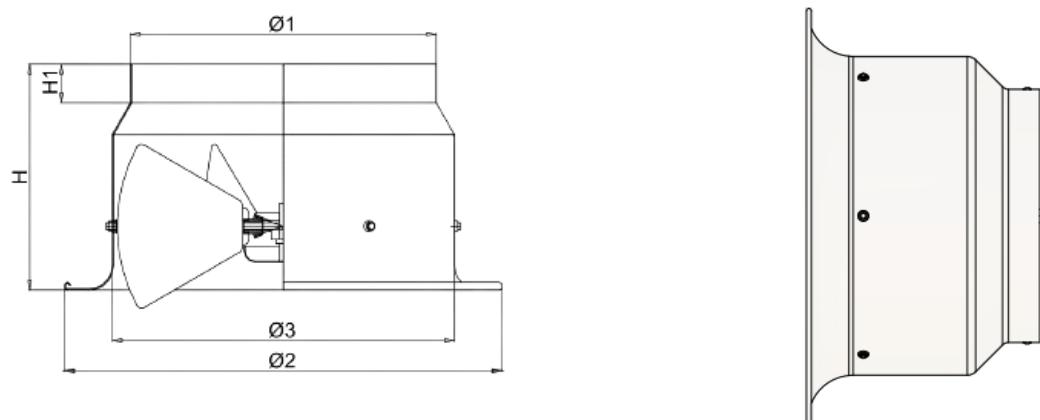

Dimensional range: $\varnothing 250$, $\varnothing 315$, $\varnothing 400$, $\varnothing 500$, $\varnothing 630$.

Materials

The main bell of the diffuser is made of aluminum and blades are made of galvanized steel.

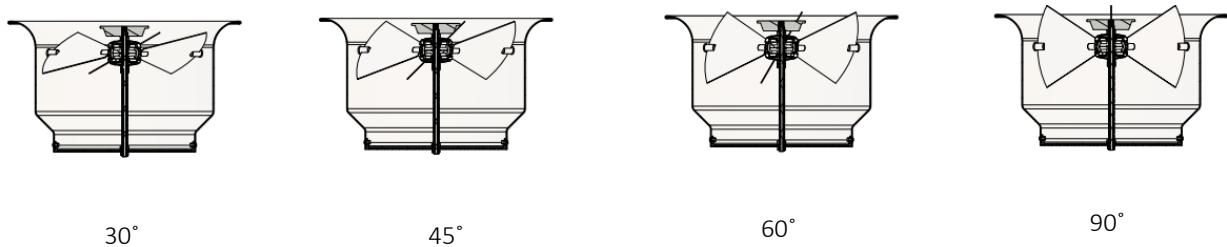

The diffuser is painted in electrostatic field in glossy white RAL9016.

Technical drawing

| Model | Ø1 | Ø2 | Ø3 | H | H ₁ |
|-------|------|------|------|------|----------------|
| | [mm] | [mm] | [mm] | [mm] | [mm] |

| 315 | 313 | 458 | 348 | 230 | 40 |
| 400 | 398 | 563 | 437 | 260 | 60 |
| 500 | 498 | 683 | 540 | 280 | 60 |
| 630 | 628 | 803 | 675 | 325 | 70 |

Positioning the blades

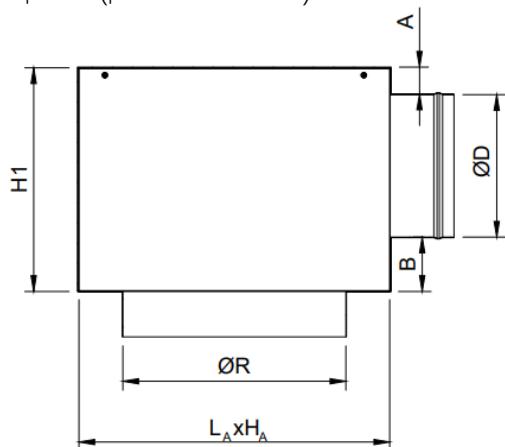

Accessories

The diffuser can be delivered with a connecting plenum to the circular duct, with horizontal connection.

The plenum is provided with suspension elements (lugs) and bead roll on the spigot, for easy fixing of the flexible duct.

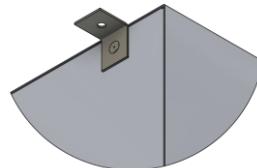

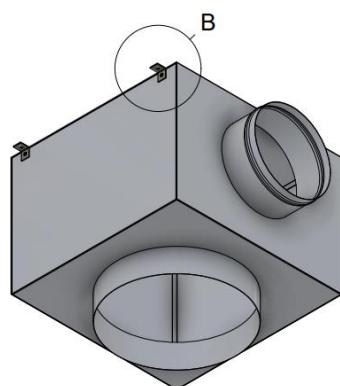

The plenum is delivered insulated or uninsulated.

Adapter (plenum box)

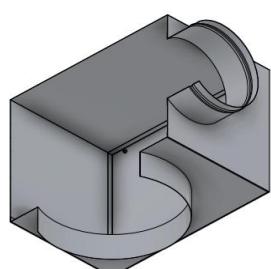

$L_A \times H_A$ – depending on $\varnothing R$
 A, B, H_1 – depending on request and $\varnothing D$
 $\varnothing R$ – connection diameter VSR + 4 mm

The adapter is made of galvanized steel sheet Z140 and is equipped with 4 lugs for suspension.

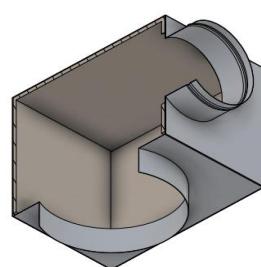

B - Suspension lug

On request, the plenum can be insulated inside with 6 mm thick elastomeric rubber.

AN - Uninsulated adapter

AIZ - Insulated adapter

The legend

Ak [m²] - The free surface

X [m] - The length of the air jet

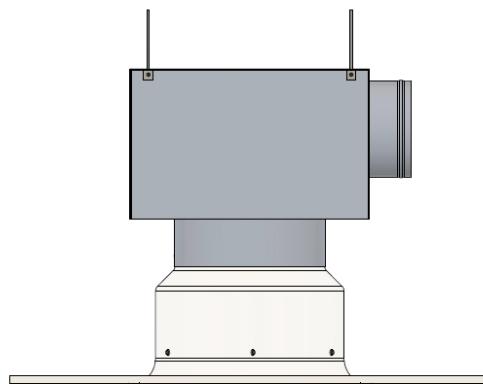

NR [dB (A)] - Noise level without room attenuation

ΔPt [Pa] - Pressure loss

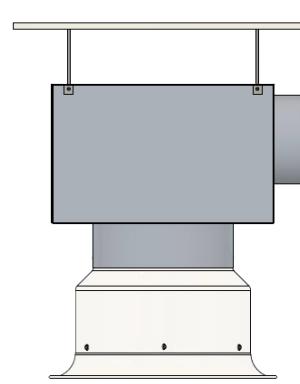

Installation

The diffuser is mounted in a continuous ceiling or suspended. Fastening is done with screws.

Installation in continuous ceiling

Suspended in the ceiling
