## Antimicrobial

This additive can be added to any of our standard powder colors and will prevent the growth of micro-organisms on any painted surface.

NOTE: The colours in this finishing catalogue have been reproduced as accurately as possible with the limitations of printed ink colour reproduction technology. As a result of exposure to sunlight or ageing, colours may fade or discolour. In actual use, colours may appear to vary according to area, surface gloss, lighting (artificial or natural) or application. As a result, you should expect variations in colour or shade - we cannot guarantee otherwise. To determine the exact colour desired please contact our local representative.
