Air filter with frame F-R

Description

G4 air filter with "U" type frame is used in ventilation-air conditioning systems for air filtration. It is recommended for mounting on extraction (return) grilles.

Technical specifications

Characteristics

F-R is composed of G4 filter material and "U" type aluminum frame.

The thickness of the filter material is 20 mm.

Materials

The filter material is made of synthetic polyester.

The filtering capacity of the material is 94% and according to EN779 it has G4 filtration class.

The filter frame is made of extruded aluminum profiles with natural finish (unpainted).

Maintenance

The product does not require maintenance, but periodic checks are recommended to check the degree of clogging.

Technical drawing

The large dimensions are made of several independent pieces.
